**INLAND HARBOURS IN CENTRAL EUROPE:
NODES BETWEEN NORTHERN EUROPE
AND THE MEDITERRANEAN SEA**

International conference, 1-2 december 2016,
Maison des Sciences de l'Homme (MSH) de Dijon
within the framework of the Special Research Programme
(DFG-SPP 1630) »Harbours from the Roman Period to the Middle Ages«

The conference was funded by:

Deutsche Forschungsgemeinschaft; Jena University; Université de Bourgogne (BQR); UMR 6298-ARTEHIS; Institut national de recherches archéologiques préventives (Inrap); Ministère de la Culture: Direction régionale de l'archéologie en Bourgogne-Franche-Comté

PREAMBLE

The Priority Programme 1630 »Harbours from the Roman Period to the Middle Ages« funded by the German Research Foundation (Deutsche Forschungsgemeinschaft) in the years 2011-2018 has made it its priority to unite and connect multidimensional approaches to harbour research within the vast area from the North Atlantic to the Mediterranean. Modern approaches of the last three to four decades have particularly shown how the integration of historical, archaeological, geophysical and geoarchaeological sources and methods have stimulated harbour research – and how crucial it is to offer a framework for international discussion and scientific exchange. The conference held in Dijon in the framework of the Priority Programme significantly contributes to this approach, especially to the French-German research network, which is illustrated by this conference volume. Our thanks go especially to Marion Foucher, Annie Dumont, Lukas Werther and Doris Wollenberg, who were responsible for both organizing the conference and for the editorial responsibilities of this volume. Moreover, our thanks go to the editorial team of the RGZM in Mainz.
